## Experience

**Infosys Limited /** Systems Engineer
OCTOBER 2018 - PRESENT, THIRUVANANTHAPURAM
Working as part of the Backend development team in the project using **Java, Spring-Boot framework, Micro-services, GraphQL, and Oracle database.**

Gained exposure in full life-cycle implementation with skills in executing SDLC using **Agile** methodologies.

Using **GIT** as version control for the project, **JIRA** for tickets handling, and **Confluence** as our knowledge-sharing platform.

—

## Training

**Infosys Limited /** Systems Engineer Trainee
MAY 2018 - OCTOBER 2018, MYSORE
Completed generic training on Python, Data Structure, DBMS and J2EE with introduction to Hibernate.

—

## Projects

**Manage manufacturing cycle for a cosmetic company**
OCTOBER 2018 - PRESENT

The platform is used to manage the entire manufacturing of different cosmetics across multiple locations. The platform was primarily used by:

• R&D scientists of the client's cosmetic company

• The backend executives at the manufacturing warehouse

The scientists used this application to share the details of the raw materials and the manufacturing instructions for making various cosmetic products. The backend executives at the manufacturing unit used to refer to the instructions and make production accordingly. The platform was also used to change the instructions according to the location, based on certain factors like weather, raw material availability etc.

The warehouse team also used this application to manage stock of the raw materials.

**Responsibilities:**

• Involved in moving the entire platform from VBA desktop app to a Micro-services based platform using Java, GraphQL & Spring Boot tech stack

• Took ownership of an end-to-end feature to ensure the required feature is developed.

• Participated in sprint planning, retrospectives, grooming sessions, and daily stand-ups

• Suggested new ideas or improvements in the current code base, product and user flows.
