PERSONAL PROJECTS

Face ID Attendance System (FIAS)

- The main motive of the FIAS is to provide an attendance system that is based on the Face Recognition system which will be operated by a mobile app. It will reduce the cases of impersonation and will also automate the whole attendance process which will reduce human efforts and human error.

Learning Management System (Website) (2017)

- The Project was built to provide a learning platform for the students of a University through various techniques like regarding availability of books, online reading materials, tutorials, etc.

Salary Management System (2016)

- The project was developed to make easy and fulfill the need of calculation and maintenance of salary of employees in any company or organizations. This project was programmed in C++.
