### Career Objective

To pursue a challenging career and be a part of progressive organization that gives a scope to enhance my knowledge and utilizing my skills towards the growth of the organization.

### Technical Skills

Domain	Technology used
Skills	HTML5, CSS3, JavaScript (ES6) and basics of React.js
Other Skills	AJAX
Tools and Technologies	Microsoft Office 365, GitHub, Netlify and Visual Studio Code

### Work Experience

#### **CDM Smith: Entry Service Desk Specialist (August 2019 – Present)**

- Majorly working in the Refresh Assisted Setup team which takes care of setting up new laptops for new hire and current employees who receive new laptops every 3 years as per the firm's refresh program. Apart from setting up the new laptop also taking care that the end-users have successfully transitioned to it from the old one.
- Also helping the Service Desk team in handling the incident queue. Taking up calls/chat and helping end-users troubleshoot their issues, analyzing the issues for documenting, and assigning it to the L2 team or the concerned team as needed.

### Projects:

#### **1. Name:** Grocery Bud

**Technologies implemented:** HTML5, CSS3, JavaScript and VS Code.

**Description:** A to-do list which can be used while grocery shopping or for any other purpose. The items are stored in browser's local storage so that the items survive a page refresh or close just like a to-do list is supposed to be and those items can be deleted or edited as per requirement. Deployed via Netlify.

URL: <https://todowebapi.netlify.app/>

#### **2. Name:** Budget App

**Technology implemented:** HTML5, CSS3, JavaScript and VS Code.

**Description:** A budget calculator that will help a user calculate the balance amount after any or all expenditure. The expense item name or value can be edited as well as deleted as per requirement. Deployed via Netlify.

URL: <https://calculatorbudget.netlify.app/>

#### **3. Name:** Comfy Store

**Technology implemented:** HTML5, CSS3, JavaScript, AJAX and VS Code.

**Description:** A home decor furniture online site. Where the user can add items to the cart as per choice and the amount of a particular item can be increased or decreased in the cart. Deployed via Netlify.
